

**The following is a local policing update for the Attleborough neighbourhood
Weekly crime summary**

District overview

We have experienced a number of ‘opportunist’ thefts in recent days – most of which could have been avoided had there been more thought into where and how things are left on view to passers-by. There is no particular pattern to any of these offences but it would be safe to assume that those involved are using a vehicle – as always I appeal to you – the ‘eyes and ears’ of the community to report any suspicious activity to the police.

If you are concerned regarding these crimes and would like further crime prevention advice call 101 and we can arrange for you to have a crime prevention survey. Please keep a watchful eye on anything you see suspicious. If you do please do not hesitate to call 101 or 999.

Please note the information contained within the crime summary is information suitable for public distribution and does not include certain categories which may have personal privacy or data protection implications.

Please note there will be no voice message to accompany this week’s summary.
